Natural Energy Efficiency and Sustainability (NEES)

Best Practice in Products and Services

1. Product Description

CL-wood is a multileveled wooden panel with every other layer cross added, creating a dimensionally stable building component with a high load capacity in relation to its own weight. By using large, stable element in CL-wood facilitates rational, efficient installation and reduced construction period. CL-wood can be combined with other materials to create interesting design solutions.

3. Percentage of the product processed and /
or manufactured in the NPP region
100%

4. Recyclability / biodegradability
100%

5. Contribution to energy efficiency in buildings
Properties of a wooden structure

6. Lifespan
50 years

7. Costs – Product and maintenance
6000-9000 SEK/m3

8. Examples of usage
See photos on homepage.
